

Touch Screens

Stick it and touch it: Interactive touch screen foil for through-window touch screen applications.

If you are looking to take advantage of the expanding market for through window/glass touch screen applications then 24/7 Media's Interactive touch screen foil has been designed for you.

Our lightweight touch screen foil can be applied directly to a window or a glass sheet and then a rear projection screen or LCD can be mounted behind the touch screen foil to create a through window/glass touch screen experience. The Interactive touch screen foil can be mounted using either a permanent or a removable fixing method allowing the touch screen unit to be moved to another location if required.

The touch screen foil is ideal for upgrading existing through window

rear projection or LCD displays to create a through window touch screen experience. There are no external components required with 24/7 Media's Interactive touch screen foil so the installation is completely safe behind the window.

Product features
